

Environmental guide for Subcontractors

Aim 5: Establish balanced, long-term relationships with our partners, suppliers and subcontractors

- > Action 5.1: Involve subcontractors in our QSE approaches.

 **Entity:** Bouygues Bâtiment Île-de-France

 **Operational Unit:** Habitat Résidentiel

Overview of the Initiative

- > **Objective:** To draw up an environmental guide for finishing work.

- > **Description:**

Companies need to change their everyday habits to become more environmentally friendly. Habitat Résidentiel has drawn up an environmental guide to raise its partners' awareness of good environmental practices. It includes a general section for the building industry as a whole and trade-specific sections.

This illustrated and concise guide summarises Habitat Résidentiel's environmental recommendations to help its subcontractors to manage their dangerous waste. It also describes simple and sensible eco-actions that can be immediately applied to Habitat Résidentiel's constructions. It is being gradually distributed to all its partners and works managers.
