

## Catalogue Eco Material 2008

### **Aim 6: Ensure that our businesses respect the environment (building sites)**

- > Action 6.5: Develop equipment of high environmental standard

 **Entities:** Bouygues Construction

 **Operational unit:** GIE Matériel

## Overview of the Initiative

- > **Objective:** To provide eco material for sites.

- > **Description:**

To improve environmental performance on sites, GIE is developing and offering eco material.

GIE has come up with a catalogue of all the eco material currently available. All the material has its own entry detailing the product's advantages and information needed to set it up.

The material is based on six major priorities:

- anti-pollutants
- the protection of natural resources
- the protection of energy resources
- ergonomics and well-being
- reduction of noise pollution
- reduction of dust

The 2008-2009 catalogue has 23 new eco material and will be available in French, English, Spanish and German.

The catalogue is given to the site supervisor at each launch meeting.

 **Partner:** Distrimo, classified renter (Distrimo, BM Location,...)

 **Start date:** December 2005

 **Indicators:** - amount of eco material implemented in the year  
- 32 eco material entries described in the catalogue
