

Considerate Constructors

Aim 6: Ensure that our businesses respect the environment

- > Action 6.4: Aim for a high level of environmental protection and extend this to all continents

 **Entity** : Bouygues Bâtiment International et Bouygues Entreprises France-Europe

 **Operational Unit** : Bouygues UK

Overview of the Initiative

- > **Objective:** to limit the impact of Bouygues UK sites on the local neighbourhood
- > **Description :** Gaining Consideration Constructor status

Considerate Constructors scheme is a voluntary scheme set up in the UK to improve the public's perception and reputation of construction sites. The aim of the scheme is to ensure all sites manage their impacts, on the local environment and neighbourhood in areas such as reducing noise, cutting waste and keeping to sociable working hours.

Sites that are part of the scheme are required to sign up to an eight point Code of Considerate Practice which includes the categories, Accountable, Cleanliness, Considerate, Environment, Good Neighbour, Respectful, Responsible, and Safe.

Sites are monitored by an experienced industry professional to assess their performance against the code.

The aim of the code is to encourage best practice above the statutory requirements. The areas are inline with the Bouygues Bâtiment International guides for managing the impacts of our sites. These guides are used to assist sites in achieving the standard and ensuring all sites limit their impact on the local area they operate in.

All Bouygues UK sites are registered in the Considerate Constructors scheme and have received Silver or Bronze awards for the sites. In the last year certificates of achieving the standards were awarded to Greenvale Special Needs School (Bronze) and Crofton Secondary School (Silver). There is an annual presentation of the awards and the other current sites will receive theirs in the coming year.

The scheme has recently been updated and it is now for Bouygues UK to rise to the challenge and improve our performance on site to achieve the Gold standard.
