

Provision of drinking water for the populations

Aim 7: Participate in the economic and social life of the regions where we operate

- > Action 7.3: Promote actions to support education and health

 **Entity:** Bouygues Bâtiment International

 **Operational Unit:** Bouygues Bâtiment Guinée Equatoriale (BBGE)

Overview of the Initiative

- > **Objective:** To ensure that the populations have access to drinking water and distribute to public establishments on a regular basis (clinics, schools, etc.).

- > **Description:**

BBGE has launched an assistance program for local populations in this country where drinking water is not generally available for all. This action will restrict the spread of serious diseases (such as typhoid).

A water distribution point has been created at all BBGE sites. The water is analysed regularly to ensure it remains drinkable.

In addition, BBGE provides the municipality with a truck and a loader once a week to clear up rubbish.
