

Profile

Bouygues Construction is a global leader in the building, civil works and electrical contracting and maintenance sectors. Operating in some sixty countries, it combines the power of a large group with the responsiveness of a network of companies organised as seven complementary entities. Thanks to its expertise in financing, designing, constructing, maintaining and operating buildings and structures, it offers its customers a vast range of innovative solutions.

Bouygues Construction has adopted a structured strategy with regard to sustainable development, enabling it to strike a balance between economic profitability and the social, community and environmental impact of its businesses.

Employing 53,700 people throughout the world, the Group generated sales of €9.5 billion in 2008.
